Natural Habitat

Where Animals Thrive

Love for the offspring is not just a human characteristic; it is common among wild animals too. For us humans, we are innately blessed to extend our love towards nature and creatures of the wild. In a world where conflicts between humans and animals are on the rise, we need to remind ourselves that coexistence is our only option. Let's make sure that animals live their lives to the fullest, where they belong - their habitat.

This calendar is a celebration of the animal kingdom. The animals are painted using water colours and the calendar is printed on eco-friendly paper. Let's be conscious of our wellbeing; theirs too.
